~ VICTOR Taichung & YCM collaborate creating new peak of yield in Taiwan machinery industry 04/12/2006

Taiwan machinery industry has reached a mature stage with positive reputation well known globally after several decades of development. Even so, insufficient utilization of major suppliers and aggressive competition between manufactures were the major factors in resource wasting. Consequently, Taiwan manufactures have felt extreme pressure from global competitors such as German and Japan.

On September 2006, Taiwan's Industrial Development Bureau, Ministry of Economic Affairs, and Corporate Synergy Development Center had taking on a role as founder, calling up two major manufactures, Victor Taichung and YCM and twenty-one main suppliers in Taiwan to form a Dual-core Collaborative Team. The goal of this project is to unify all resources, increase manufacture efficiency to bring Taiwan machine industry into a new era.

The Dual-core Collaboration project, consisted of VICTOR Taichung, YCM and FONGEI Industry and Keyarrow (main suppliers) are under the guidance of proficient consultant team. Thought progressive learning and trusting between manufactures and suppliers, and by bring in the proven successful "A-Team" method from Giant Bicycle Managements module combined with Toyota Production System (TPS) to Taiwan's well established machining industry, it is expected that members would all benefit from this project.

Currently, Taiwan machinery export has been on the top five of global ranking. It is our goal to bring in more companies to participate in this procession of industry cooperation and integration. To create new opportunities, promote international competition and surpass major global machine tool manufactures in the nearly by future.
